After registering, you will receive a confirmation email containing information about joining the meeting

Who should attend?

Those interested in how community languages can lead to economic empowerment for flourishing.

What will be covered in the sessions?

- Theological paradigms
- Introduction of Wordly Collective
- Presentation and analysis of the negative impact of the lack of language resources for Minority Language Communities.
- Introduction of like-minded organizations
- Discussion and networking for collaboration

Wordly Collective is a not-for-profit social enterprise which aims to help minority language community flourish using the languages they value most. We envision this to be done through innovative collaborations with the public and private sectors, civil society and the global translator community.

We seek to empower marginalized minority language communities, help more people step out of poverty, create localized information that will improve overall health and well-being and improve access to education.
